

THE ÖREKIL-RIVER SALMON FISHING 2020

MUNKEDAL

The lower Örekil-river's fishing district contains all of the river, from the outlet of the lake "Kärnsjön" by "Torpdammen" to the north, to and including the river's mouth in "Saltkällefjorden" by Munkedal's harbour to the south.

The opening day of the fishing-season is May 1st and the season ends on September 30th. The regions are the same as last year, and with the same special areas for fly-fishing. Information maps of the fishing regions, fly-fishing areas, pools etc. can be found on the overleaf.

The General Public have the possibility to purchase fishing licences to three different regions of the river, A, B and C. Pre-bookings of fishing licences can be done at "Sportfiskekontoret" (Sport Fishing Office) by telephone +46-524-10777 and the best time to call is between 7.00 and 9.00 am, Monday - Friday.

All the fishing licenses that are booked in advance shall be paid immediately, and no later than within two working days, to the fishing association's bank account. See payment instructions below.

Pre-booked fishing license is valid only when payment has been made. If pre-booked and paid licenses are canceled, is the main principle that no refund of the fee is made. Licences can also be purchased on site at the Sport Fishing Office (see map) and at "Brålands Gård".

All the fishing regions are well marked with posts. The boundaries for the fly-fishing areas are marked with orange posts (region A and B). In the fly-fishing areas fishing is only allowed with fly-rod with fly-fishing line. Fishing is allowed on the whole river in all of the three regions, but to avoid "tangling with others" there are parts of the river where fishing is allowed from only one shore of the river. Please note that fishing in pool # 27 (above Kvistrum bridge) is restricted, so that fishing is not allowed from the western side of the river, but only from the eastern side.

Fishing from boats, boat jetties or from private land is not allowed. Fishing licences are valid for one day, from 00.00 to 24.00 on the day listed on the licence. All the fishing rules and regulations, and good fishing ethics, are to be followed.

Region A:

This region is the highest up the river and is restricted at its upper part to the **west** side of the river. Fishing is allowed from approx. 40 meters south of the salmon steps at "Brålandsfallet", and downstream to the south end of pool # 14. In pool # 9 fishing is allowed from both sides of the river. Then on the **east** side of the river from the island at "Skäret" to the junction with the Munkedal river, where this region ends. Please note that higher regions of the "Brålandsfallet" are not part of the fishing regions and as such fishing is prohibited. The region does not incorporate any part of the Munkedal river.

Region B:

On the **east** side of the river from the junction with the Munkedal river, and on the **west** side from "Gatesand", then downstream on **both** sides to the south end of this region at the railway bridge at "Åtorp". In pool # 19 fishing is allowed from both sides of the river. Please note that fishing is not allowed from the west side of the river in the lower part of pool # 25. Also note that the lower part of the region is shared with region C.

Region C:

On **both** sides of the river from the point of land at "Åtorp", downstream to the mouth of the river at "Saltkällefjorden". Please note that the upper part of the region is shared with region B.

Number of licences
to each region:

Odd numbered days: 20 per day
Even numbered days: 3 per day

Even numbered days: 20 per day
Odd numbered days: 3 per day
